Data Scientist | Insurance Specialist | Consultant

Career Summary

A highly experienced manager commended for high-quality and insightful analysis. These insights helped the bottom-line success of multiple corporations in Australia.

As innovative technologies change our world, I keep my skills at the front and centre of emerging data science systems. I am passionate about solving complex commercial problems using contemporary data techniques.

Key Strengths

- Delivery of timely, high-quality, insightful analytics of insurance data
- Strong procedure adherence in the strict environment of financial services
- Project Manager who is experienced in leading multiple concurrent projects
- Interrogation and manipulation of data from various internal and external stakeholders
- Ability to communicate findings and recommendations via reports and presentations
- Calm, confident decision maker
- Qualified Lean Six Sigma Green Belt analyst
